Incident: INC-014 ✕

Date Occurred:
Apr 26, 2025

Location:
Outskirts of Ndoni Community, Ndoni–Ebocha Highway

Description:
A Toyota Hilux vehicle (KMK 419 HU), hired by Oando, was involved in a lone road traffic accident while returning from an oil spill containment operation at Odugri. The driver lost control during heavy rainfall and low visibility, causing the vehicle to veer off the road and overturn. All occupants were rescued and taken for medical evaluation; no fatalities occurred

Immediate Cause:
Loss of vehicle control due to heavy rain and low visibility; violation of convoy movement protocol; possible fatigue.

Root Cause:
Failure to adhere to the Journey Management Plan (JMP); lack of supervision during demobilization; inadequate risk assessment before departure; absence of post-incident alcohol or drug screening.",

Consequences:
Vehicle overturned; minor injuries to personnel; potential for severe injury or fatality; temporary loss of vehicle use.

Recommended Actions:
Ensure strict adherence to coordinated convoy movement and journey risk assessments before departure.

Outskirts of Ndoni Community.

HAZ-014   HIGH

A lone Oando-hired Toyota Hilux lost control
along the Ndoni–Ebocha highway during heavy
rainfall, resulting in the vehicle veering off the
road and overturning. The event highlights gaps
in journey management and convoy adherence
during adverse weather.
